

EAST INFORMATION SOURCES

(GIVEN IN PARENTHESIS AT THE END OF MOST BIOGRAPHIES)

Federal Census & Mortality Schedules are coded with small case letters for the given census years, and immediately follow a county code number; Other codes are shown are on the third line down:

a = 1790; e = 1800; h = 1810; i = 1820; j = 1830; k = 1840; n = 1850; q = 1860; r = 1870; s = 1880; o = 1890; u = 1900; v = 1910; w = 1920; f = 1930

 y = Court Records / Information;
 z = Land & Property Deeds / Records;
 Z = Federal Social Security data.</p> |
|---|---|

Those states which have a statewide Birth / Marriage / Death index, will show as the state code followed by a small b / m / d / or census year letter. Example, TXd would be for a Texas death record. States that have a state census ending in the "5" years, such as 1895, 1905, etc, would have the same small letter as the preceding Federal census. Example, a Wisconsin 1895 census would be Wlo. The biography itself should tell what city and / or county of the state where the state census was. A census in Canada and England are in the years ending with a 1, such as 1871 or 1881. So a census record from these two countries would be shown as the county followed by the census year letter of the US Federal census just prior. Example, Joliette Province Canada 1881 census would be CANr for an 1881 Canadian census, or ENGr for an 1871 England census record. You will know from the biography which county in that country is refers to.

Various State Counties Are Designated with the Following Numbers, and Immediately Followed by the Letters Shown Above.
