

How old were you when you went to France with your mother? Or maybe you know a date -

It is my understanding that we made several trips to France to visit some of the grandparents. The last trip was around 1913 or 1914.

Would it be wrong to assume, I wouldn't take it for a fact but it would be a base, that your mother was born near or around St. Girons, France, where her parents were living. -

I believe that my mother was born in Southern France in a small town by the name of "Cust" which is about 25 km south of St. Girons. In this immediate area there were several Rieu families that were farmers.
